Patent Cooperation Treaty (PCT) Information

For information concerning PCT member countries, see the notice appearing in the *Official Gazette* at 1267 O.G. 34, on February 11, 2003.

Either the United States Patent and Trademark Office (USPTO) or the European Patent Office (EPO) may act as the International Searching Authority (ISA) for an international application filed with the United States Receiving Office or the International Bureau (IB) as Receiving Office where at least one of the applicants is either a national or resident of the United States of America. However, the EPO is no longer a competent ISA, within the meaning of PCT Article 16(3), for international applications filed by US residents or nationals on or after 01 March 2002 in the USPTO or IB as Receiving Office, and where the application contains one or more claims directed to the fields of biotechnology or business methods. For the definition of what the EPO considers to be precluded subject matter in the fields of biotechnology and business methods, applicants should see the "Notice from the President of the European Patent Office," dated 26 November 2001, and which is published as Annex A in the "Notice Concerning EPO Competence to Act as PCT Authority" in the *Official Gazette* at 1255 O.G. 878, on February 19, 2002.

The European Patent Office may act as the International Preliminary Examining Authority (IPEA) for an international application filed in the United States Receiving Office or the International Bureau as Receiving Office where at least one of the applicants is either a national or resident of the United States of America, provided that the European Patent Office acted as the International Searching Authority. However, the EPO is no longer a competent IPEA, within the meaning of PCT Article 32(3), for international applications filed by US residents or nationals in the USPTO or IB as Receiving Office where the corresponding demand is filed with the EPO on or after 01 March 2002, and where the application contains one or more claims directed to the fields of biotechnology, business methods or telecommunication. For the definition of what the EPO considers to be precluded subject matter in the field of telecommunication, applicants should see the "Notice from the President of the European Patent Office," dated 26 November 2001, and which is published as Annex A in the "Notice Concerning EPO Competence to Act as PCT Authority" in the *Official Gazette* at 1255 O.G. 878, on February 19, 2002.

The search fee of the European Patent Office was increased, effective October 15, 2002, and was announced in the *Official Gazette* at 1263 O.G. 42, on October 8, 2002.

International fees were changed, effective on January 1, 2002, due to a change in the exchange rate of the U.S. dollar with regard to the Swiss franc, and were announced in the *Official Gazette* at 1253 O.G. 88 on December 25, 2001. A change in the maximum number of designation fees payable, with effect from January 1, 2002, was announced in the *Official Gazette* at 1253 O.G. 88, on December 25, 2001. A change in the reduction for electronic filing, with effect from January 1, 2002, was announced in the *Official Gazette* at 1253 O.G. 88, on December 25, 2001.

Certain domestic PCT fees have been changed, effective October 15, 2002, to adjust certain patent fee amounts to reflect fluctuations in the Consumer Price Index. The revisions were announced in the *Official Gazette* at 1249 O.G. 111, on August 28, 2001.

a request for publication of an application as amended during examination (37 CFR 1.215(c));
a request for redacted publication (37 CFR 1.217(b));
a request for voluntary publication of an application filed before November 29, 2000 (37 CFR 1.221(a)); or
a request for republication of an application that has already been published (37 CFR 1.221(a)).

Instructions on how to file such an application request via EFS are located on the Office's Electronic Business Center on the Office's Internet Web site http://www.uspto.gov <http://www.uspto.gov>) under the Electronic Business Center section.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information for the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis optical disk series are available at all PTDLs to increase access to that information. It is through the optical disk systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI^3) at the Sunnyvale Public Library in Sunnyvale, California.
